Two North African innovators came tops at the first ever Innovation Prize for Africa, sweeping all the two prizes at stake at a ceremony at the Sheraton Hotel in Addis Ababa, Ethiopia. The winners are from Egypt and Algeria.

The \$100,000 first prize went to Egyptian Mohammed Sanad, a professor at the Faculty of Engineering, Cairo University, Egypt. And the \$50,000 second prize went to Algerian chemist, Zeinou Abdelyamine.

Sanad's award winning innovation is a low-cost, lightweight, insulated lead
